THE WARM SIDE OF DESIGN

1 AGSTEL – AGORÀ ELECTRIC without decoration

Table explaining the model code structure: 1 AGSTEL# (CHOSEN Model), 2 040 (Code relating to the HEIGHT), 3 006 (Code relating to the No. of ELEMENTS), 6 xxxx (COLOUR/FINISH code shown in the Tubes Colour Chart).

Main product table with columns: Code, Description, H (cm), N° of Elements, L (cm), Electric heating Element, Price(€) cat. C0, Price(€) cat.C1/C2, Price(€) cat. C3(€). Rows list various AGSTEL models with their specifications and prices.

6 xxxx Specify colour code (see TUBES colour chart)

ELECTRIC SETTINGS WITH «ZRF» THERMOSTATS

Electric setting is via the use of the following thermostats that regulate the room temperature by interacting with up to max 5 radiators.

WI-FI thermostats

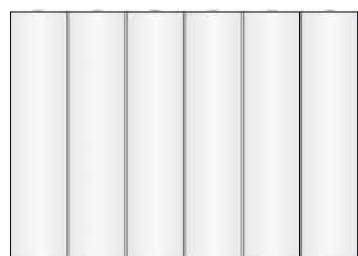

WIRELESS thermostat

Each model in the ELEMENTS electric collection can be connected in three different ways:

- DIRECT connection to the household electricity network via a switch or a home automation system.
- Connection via the WI-FI Thermostats, ZRF081_Matt White or ZRF082_Matt Black, supplied as accessories to be ordered separately.
- Connection via the Wireless Thermostat ZRF007, supplied as an accessory to be ordered separately.

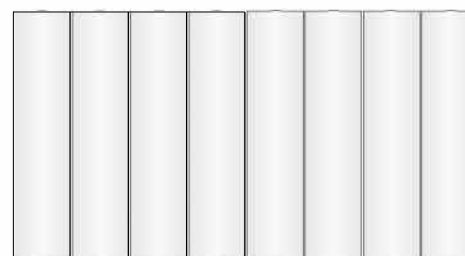

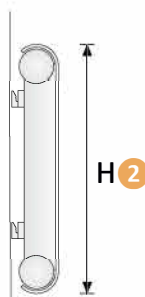

For any information on how to prepare for and/or make the respective electrical connections, please consult page follows.

Table listing thermostat models (ZRF081, ZRF082, ZRF007), their descriptions (Matt white/black WI-FI, Matt white wireless), and prices in Euros.

METHODS of electrical connection

Connection via wall-mounted Wi-Fi thermostat

(ZRF081 - ZRF082)

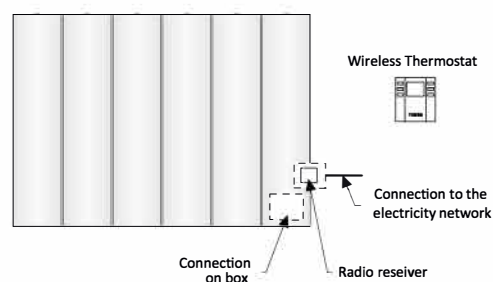

Set-up for Wi-Fi thermostat.

To install the Wi-Fi Thermostat, you need to set up a connection from the connection box of the selected model to the desired location where the Thermostat will be housed.

The Wi-Fi thermostat must subsequently be connected to the household electricity network.

Connection via wall-mounted Wireless thermostat

(ZRF007)

Connection via switch (not supplied) or to the household Home automation system
